

Build to Print

Our Build to Print capability offers our customers the opportunity to outsource the production of small to medium quantities of electromechanical assemblies, allowing them to focus on their core business activities.

We have over 25 years of experience in the production of cable assemblies, wiring harnesses, control panels and full 19 inch rack mounted equipment.

Total Solution

From your documentation package we will carry out procurement and, supported by our in-house engineering team, we will resolve any component obsolescence issues and then update drawings, schematics and Bills of Materials accordingly.

In association with our sister company Cove Sheet metal, we can also offer very high quality front panels, enclosures and racks, delivering the Total Solution in-house.

Enclosure Wiring and Assembly

19 inch racks, bespoke chassis and enclosures fully wired and assembled to your specifications and drawings.

Military

- Heater control boxes for armoured vehicles
- Ground based Radar cooling system controllers
- Rugged enclosures
- Rugged cable assemblies

Industrial

- Heater control cabinets
- Environmental chamber oven doors
- Test cell load banks
- Power distribution units
- Air conditioning unit wiring harnesses

Commercial

- Kiosks and Consoles
- Control panels
- Wiring harnesses
- Power supply modules
